

Dreamweaver CS4 Training

**3 Sessions –
9 Hours of Interactive Training**

Learn how to design, publish and maintain Web sites with the industry standard authoring tool, Dreamweaver CS4. In this course you will learn how to set up and layout Web pages using tables, CSS and templates. You'll also see firsthand how user-friendly this program is when it comes to adding interactive content like JavaScript, Flash and forms. LearnKey expert Deborah Berg demonstrates in-depth, step-by-step examples in this course to help you understand how to efficiently design, publish and maintain Web sites.

Benefits

- Improve your design skills with CSS
- Save time using Dreamweaver's productivity tools
- Create interactive Web pages

About The Author

Debbie Berg is a Web designer and the owner of WebDeb Productions, Inc. She has been designing Web sites since 1996. Berg is also an instructor and a keynote speaker and has trained thousands of individuals and hundreds of corporations on Web-related topics since 1997. Berg holds a bachelor's degree in technical writing from the University of South Florida, and when not training others, she's designing Web sites for clients throughout the U.S.

Session 1
