

Windows Server 2003 MCSA Skills Update

3 Sessions –

9 Hours of Interactive Training

The Microsoft Certified Systems Administrator (MCSA) on Windows Server 2003 upgrade exam is available only to current MCSAs or MCSEs on Windows 2000. In the Windows Server 2003 MCSA Skills Update course from LearnKey, you'll build on current abilities to develop skills needed to manage and maintain a Windows Server 2003 network. Expert instructor Aaron Spurlock shows you how to manage users and groups, Active Directory, servers, Web services, security, DNS configuration, and disaster recovery. At the conclusion of this course you'll be prepared to pass MCP exam 70-292.

Also Available:

- Study Guide
- Test Prep

About The Author

Aaron Spurlock is an MCSE+I, MCT, CNE and CNI. He has consulted and trained on networks and computing for the past 15 years with Lucent Technologies, Mastering Computers, Scientific-Atlanta and the Florida Marlins, among others. He currently owns Technovation Design in Ogden, Utah, specializing in Windows 2000 and NetWare 5 consulting as well as home and corporate automation technologies.

Session 1

- Import/Export
- Import Syntax
- Scripting
- dsadd
- dsadd group

Section E: Managing Active Directory

- User Accounts
- Copy User Properties
- Modify Multiple Accounts
- Drag & Drop
- Managing Objects
- Saved Queries
- MMC Advance Features

Section F: Authentication Issues

- Troubleshooting
- Log on Location
- Reset Password
- Lock Out
- Unlock
- Computer Account

Session 2

Section A: Terminal Services

- Features
- Licensing
- Installing
- Configuring
- Add Licensing Server
- License Server
- Install Service

Section B: Maintaining TS

- Configuration
- Connections
- Security
- Remote Control
- Issues

Section C: Managing Servers

- Remote Desktop
- Remote Connection
- Remote Desktop Tools
- Setup Remote Access
- Add Connections
- Use Connections
- Remote Management

Section D: Managing Web Services

- Manage Server Wizard
- IIS Server Role
- Manage IIS 6.0
- Configure IIS
- Web Service Extensions
- Add Components
- Default Web Properties

Section E: Secure IIS 6.0

- IIS Manager
- Authentication
- Restrictions
- Certificates
- Certificate Requests
- Application Pools

Section F: Software Updates

- Software Update Services
- Manage SVS
- Update Clients
- Schedules/Locations

Session 3

Section A: Server Security

- Security Templates
- Configuration Analysis
- Apply Security Settings
- Least Privilege
- Run As Command

Section B: Configuring DNS Servers

- Installing DNS
- Configure DNS
- DNS Zones
- DNS Properties
- Monitor DNS
- Debug Logging
